

Hazardous Materials Management Desk Reference Third Edition

ERRATA Sheet

Greetings,

Great efforts have been made to ensure the accuracy and adequacy of the materials in this desk reference, however, the editors are aware that errors can and will occur in a comprehensive textbook written by several subject matter experts. As part of AHMP's continuous improvement efforts, the editors have released the following errata sheet for the 3rd Edition of the Hazardous Materials Desk Reference.

AHMP values the volunteer efforts of its members and if any additional errors are discovered or if you have recommendations for content enhancements, please forward your comments to the Editor via email to incorporate in the next printing of the Desk Reference.

Your feedback is greatly appreciated.

Respectfully,

Charles W. L. ("Chip") Deale, FASAE, CAE

Chapter 29c – A Generator’s Perspective on the RCRA

Page 723, paragraph 2

Waste determination and classification [40 CFR Part 261] is the most important component of RCRA. It is discussed in depth in chapter 29A. All other regulations depend on an accurate determination of all waste streams generated, transported, treated, or disposed of. Misclassification of a waste can cost a company thousands of dollars in penalties or extra disposal costs.
